Subject: Microsoft Settlement

I think this case should be settled promptly as it has no merit at all. The cost of windows software is very reasonable to persons like me, before microsoft the computer was next to useless. They made the computer easy to use for most people even at a \$1000.00 windowa would be a bargain to me. as far as anti trust and price fixing one only has to drive down main street usa and observe the price of gas note how the price changes up and down all at the same time. if you want more examples how about your electric and natural gas utilities. To sum it up there are a lot of others that are more guilty than microsoft.
